BLEACH | TECHNICAL DATA

DESCRIPTION

Bleach ensures quick and effective bleaching action to remove stains and other deposits from various fabrics. Difficult protein deposits and other food residues are peptised and easily rinsed away.

Bleach can further be used as an additive to dishwashing applications to remove stains and other deposits from stainless steel cutlery.

APPLICATION PROCEDURE

Sanitize & Clean:

Dilute Bleach one (1) cup concentrate on ten (10) litres of water and wash contaminated area with mop or cloth.

Stain Remover:

Dilute Bleach one fourth (1/4) cup concentrate on five (5) litres of water. Soak for five (5) to fifteen (15) minutes and rinse with fresh water. Wash with normal detergent.

Brightening Clothes:

Dilute Bleach one fourth (1/4) cup concentrate on ten (10) litres of water. Soak clothing for five (5) to fifteen (15) minutes and rinse with fresh water. Wash with normal detergent.

CAUTION: NEVER APPLY CONCENTRATE DIRECTLY TO FABRIC AND ALWAYS TEST FOR COLOURFAST WASHING.

Refer to the MSDS for the safety and handling precautions.

KEEP OUT OF REACH OF CHILDREN.
