GP CLEAN EXTREME | TECHNICAL DATA

PRIMARY APPLICATION

GP Clean Extreme is an excellent liquid alkaline detergent for general maintenance and floor cleaning in chemical and petroleum plants, airfields, garages, railroads and textile- and paper mills. It is also used for washing transportation equipment including aircraft, trucks, buses, railroad cars and automobiles.

GP Clean Extreme easily removes light oils and grease, household soils, body fat, dust and other soils making it the ideal household and light industrial multi-purpose cleaning agent.

GP Clean Extreme is safe to be used on tarpaulins, aluminium and other soft metals.

APPLICATION PROCEDURE

Heavy-Duty Cleaning:

Dilute GP Clean Extreme one (1) part concentrate on five (5) parts water.

Maintenance Cleaning:

Dilute GP Clean Extreme one (1) part concentrate on ten (10) to twenty (20) parts water.

Apply GP Clean Extreme with a mop, brush or wipe. Allow for maximum contact time before rinsing away with fresh water.

Transportation (Cab) Cleaning:

Dilute GP Clean Extreme one (1) part concentrate on twenty (20) to fifty (50) parts water.

Transportation (Chassis) Cleaning:

Dilute GP Clean Extreme one (1) part concentrate on five (5) parts water. Prewash with Enviro 2000 for heavy contamination.

GP Clean Extreme can effectively be applied by foaming method, spray or broom. It is advisable to prewet surfaces, particularly if they are warm. Agitate heavily soiled areas and spray rinse. GP Clean Extreme is effective in cold solutions at room temperature. Efficiency increases with higher temperatures, however. To mix, simply add to water and stir.
