

PRODUCT PROFILE

OVEN CLEAN | TECHNICAL DATA

DESCRIPTION

Oven Clean is a high caustic detergent that targets inorganic, organic, and burnt-on carbon deposits and rapidly eliminates contamination.

APPLICATION PROCEDURE

Heavily Soiled Areas:

Use undiluted.

Maintenance Cleaning:

Dilute Oven Clean one (1) part concentrate on ten (10) to twenty (20) parts water.

Oven Clean is best applied with a spray or brush. Heat surface to 60°C and allow ten (10) to fifteen (15) minutes contact time for maximum penetration. Allow the surface to cool down and wipe clean. Slight scouring may be necessary for heavy contaminated areas.

Blackened pots, pans, oven trays and other utensils must be left in a hot solution (10% at 60°C) of Oven Clean for 24 hours.

OVEN CLEAN CONTAINS CAUSTIC. USE WITH RECOMMENDED SAFETY EQUIPMENT. DO NOT USE ON ALUMINIUM, ZINC OR BRASS.

Refer to the MSDS for the safety and handling precautions.

KEEP OUT OF REACH OF CHILDREN.
